land conversion climate change and species invasions are contributing to the widespread emergence of novel ecosystems which demand a shift in how we think about traditional approaches to conservation restoration and environmental management they are novel because they exist without historical precedents and are self sustaining traditional approaches emphasizing native species and historical continuity are challenged by novel ecosystems that deliver critical ecosystems services or are simply

immune to practical restorative efforts some fear that by raising the issue of novel ecosystems we are simply paving the way for a more laissez faire attitude to conservation and restoration regardless of the range of views and perceptions about novel ecosystems their existence is becoming ever more obvious and prevalent in today s rapidly changing world in this first comprehensive volume to look at the ecological social cultural ethical and policy dimensions of novel ecosystems the authors argue these altered systems are overdue for careful analysis and that we need to figure out how to intervene in them responsibly this book brings together researchers from a range of disciplines together with practitioners and policy makers to explore the questions surrounding novel ecosystems it includes chapters on key concepts and methodologies for deciding when and how to intervene in systems as well as a rich collection of case studies and perspective pieces it will be a valuable resource for researchers managers and policy makers interested in the question of how humanity manages and restores ecosystems in a rapidly changing world a companion website with additional resources is available at wiley.com/go/hobbs_ecosystems

a new volume of the benchmark bibliography of latin american studies compiled by the library of congress

today s environmental problems climate change loss of biodiversity polluted air land and water all have their origins to a greater or lesser extent in how we have lived played and worked at a time when societies are confronted with the often dramatic consequences of past choices made in the fields of energy technology industry agriculture urbanisation and consumption we need a history that casts more light on the ways in which unsustainable human nature relationships came into being this means forging stronger connections between social and environmental history common ground opens up a dialogue between two sub disciplines that to date have remained largely parallel endeavours bringing together both established and younger scholars from both fields to explore how people s everyday lives have connected to their environments and with what effects the book is organised in six sections leisure and environment nature and conservation environmental conflicts folk and scientific knowledge environmental disasters and energy industry and urban infrastructure by exploring the complex interplay between people s day to day activities and ecological change especially the values beliefs and environmental experiences of ordinary men and women we can better understand our past relationships with nature

and perhaps make more informed planning and policy choices in the future
