The United States has enjoyed a long and venerable tradition of separation of church and state, but how is this relationship handled in Canada? With which we have considerable political, economic and social ties, church and state in Canada describes the main contours of how religion and government interact in Canada. While written from the perspective of an American separationist, it reflects the unique traditions that have developed a somewhat different style of church-state relationships in our neighbor to the north. Written to inform U.S. readers, it includes much data from a variety of sources that may not be widely known to many Canadians. Religion's impact on education, law and politics is the primary focus of the study. Wherever possible, comparisons between the United States and Canadian experiences are discussed, so readers can observe how two great democracies have approached the interaction between church and state. This overview will further understanding and increase knowledge on both sides of the border.

This engaging new anthology brings together important selections that have informed debates and generated controversies about race and ethnicity from the nineteenth century onwards. Using an interdisciplinary approach, the collection demonstrates and analyzes a transition from Canada's early focus on ethnicity to the current proliferation of sophisticated analyses of race as a concept. Resistances to traditional thinking about race and ethnicity by academics and activist communities are also discussed. The text demonstrates that despite claims of race neutrality as a preferred ideal, Canada is actually a racialized society. Race remains a key variable in influencing people's identities, experiences and outcomes.

This contributed volume includes articles on sport and gender written by leading scholars in their areas of expertise. Part I demonstrates that 1) the relationship between sport and gender has not developed in a smooth, uncontested or linear way that always privileges all males and always discriminates against all females, and 2) that the relationship between sport and gender can best be understood sociologically by tracing the intersections between sport, gender and other ways that Canadian life has been and remains stratified, such as social class, age, race, ethnicity and

sexuality in chapter 1 melissa parker and philip white explore the chronological development of theoretical frameworks addressing both the gendering of sport and what it means to be gendered in sport michael atkinson argues in chapter 2 that there is a strong link between types of research methods used and knowledge claims made by researchers in cultural struggle and resistance gender history and canadian sport m ann hall traces the early moments of organized women s sport in canada to show that women s sport in canada is built on far stronger foundations than is often assumed in the following chapter kevin wamsley argues that not all men were privileged by early canadian sport practices for instance he outlines the process through which sport became an arena for the construction of particular types of masculinity notably masculinities that helped reinforce the dominance of powerful groups of men beginning from the premise that canadian society and thus canadian sport is far from classless peter donnelly and jean harvey provide numerous examples in chapter 6 to show that there have been major social class and gender inequalities throughout the history of sport again we are reminded that gender is a complex and multidimensional phenomenon that can best be understood if we trace power differences not only between different groups of men and women but also between different versions of masculinity and femininity associated with particular social groups social classes and social settings part ii of this book focuses on the work currently being done by leading researchers in the area of sport and gender in canada on a broad spectrum of sport related topics the chapters reflect a variety of theoretical standpoints and methodological procedures these chapters emphasize the need to study gender in a way that is not only non categorical but perhaps moves beyond the distributive level towards understanding how sport assumes particular forms at particular historical junctures and grows out of relations of power that are determined culturally and reinforced ideologically in chapter 6 sally shaw and larena hoeber show how the prevalence of gendered discourses hinders the achievement of gender equity in canadian amateur sport organizations the idea that there is no singular masculinity and femininity operating within canadian sport is developed in chapter 7 in which philip white and kevin young review research findings on gender and rates and types of sport injury in chapter 8 caroline davis observes that some femininities are more closely associated with body image disorders than others and discusses the biological sociological and psychological factors acting on the relationship between sport physical activity and eating disorders chapter 9 by peter donnelly who s fair game sport sexual harassment and abuse identifies how power differences tend to exist at the heart of abusive and exploitive sport based relationships notions of power relations are also central to chapter 10 written by patricia vertinsky and sandra o

brien cousins on the effects of gender on participation in sport among older Canadians specifically their chapter demonstrates how older women are disadvantaged relative to men when it comes to involvement in sport and physical activity Victoria Paraschak's chapter on sport and Canada's First Nations peoples chapter 11 provides vivid examples of how unequal gender relations are created and reproduced over time chapter 12 calls for a collapsing of the rigid binary categories of hetero/homosexuality on the grounds that these are used to preclude full and equal gay and lesbian participation in sport identifying patterns of exclusion from participation in sport and physical activity is also the focus of chapter 13 which is authored by Wendy Frisby Colleen Reid and Pamela Ponc this chapter demonstrates how a combination of poverty and prevailing municipal recreation department policies seriously limit the opportunities of many women from active recreation in chapter 14 Brian Wilson explores how the media reinforces taken-for-granted understandings of gender appropriate orientations toward the body and sport in the following chapter Jamie Bryshun and Kevin Young provide some of the first substantial evidence for the routine involvement of female athletes in initiation/hazing rituals in Canada and conclude that power relations between neophyte and veteran female players may be just as aggressive/coercive and high risk as those occurring on male teams sport and gender in Canada reflects a growing body of work highlighting the diversity that exists among Canadian sportswomen and sportsmen in terms of factors such as age race heritage sexuality and social class to speak of a generic sporting masculinity or femininity or indeed of a generic sporting experience simply does not do justice to the complexity of Canadian sporting life

Harrison's collection of essays focuses on the intersections of race gender sexuality class and ethno/nation that influence the dynamics of human rights conflicts in different parts of the world the authors investigate human rights conflicts in Europe the Americas Asia Africa and Australia and reflect upon the political concerns and anxieties that have taken center stage since the catastrophe of 9/11 the contributors are an internationally diverse group of anthropologists and human rights activists concerned with global culturally diverse gendered experiences this book will be valuable to instructors and applied professionals in anthropology gender studies ethnic studies and international human rights
