the handbook of pesticide toxicology is a comprehensive two volume reference guide to the properties effects and regulation of pesticides that provides the latest and most complete information to researchers investigating the environmental agricultural veterinary and human health impacts of pesticide use written by international experts from academia government and the private sector the handbook of pesticide toxicology is an in depth examination of critical issues related to the need for use of and nature of chemicals used in modern pest

management this updated third edition carries on the book's tradition of serving as the definitive reference on pesticide toxicology and recognizes the seminal contribution of Wayland J. Hayes Jr., co-editor of the first edition. The feature presents a comprehensive look at all aspects of pesticide toxicology in one reference work, benefitting researchers' time in quickly accessing the very latest definitive details on toxicity of specific pesticides as opposed to searching through thousands of journal articles. The feature provides clear exposition of hazard identification and dose-response relationships in each chapter featuring pesticide agents and actions, benefitting the connection of experimental laboratory results to real-life applications in human health, animal health, and the environment. The feature covers all major classes of pesticides considered, benefitting a wider variety of researchers who are conducting comparative work in pesticides or their health impacts. The feature evaluates different routes of exposure, critically evaluating the loop between exposure and harmful effects to those who are researching the effects of pesticides on humans or wildlife. **Publisher Description**
