edward taylor fletcher was born in england in 1817 and arrived in canada as a young boy an important figure in canadian literature fletcher s writing was almost entirely forgotten by history in this volume james gifford has gathered and annotated fletcher s essays and poems writings that describe a nineteenth century canadian cultural life far more cosmopolitan than what we might have imagined fletcher was a voracious reader of works in many languages and although he was oriented toward britain his writing notably reflects a gaze fixed on a horizon much further away his work therefore stands in contrast to the tendency of later canadian writers who focus inward on the nation and on issues of canadian identity his work as a surveyor allowed him to travel across the country observing the canadian landscape which appears interwoven with different literary traditions in his metrically complex poetry by recuperating fletcher s works gifford expands our view of nineteenth century canadian literature and establishes fletcher as a remarkable literary figure worthy of attention

the global outbreak of covid 19 appears to be unprecedented in a world which has not suffered a serious pandemic for a century while society had almost forgotten the enormous impact of highly infectious diseases throughout history pestilence however has played a major role in ending the golden age of athens wrecking justinian s plans to restore the roman empire to its former glory and killing untold millions in latin america after the spanish invasion despite its importance historians have tended to

minimise the role of infectious disease partly because of a lack of scientific knowledge this has resulted in a distorted view both of the past and of the danger of disease to modern society in *armies of pestilence* r s bray a distinguished biologist and an able historian corrects this view with an exploration of the influence of disease on history the book surveys the principal epidemics around the world and across the centuries including scholarly discussion around those which cannot be certainly identified in each case bray examines the origins of the outbreaks as well as the symptoms the mortality rate and the social and economic turmoil left in their wake bray pays special attention to the infamous organism that caused the black death *yersinia pestis* as well as other grimly familiar bogey men of pestilential history including malaria smallpox typhus cholera and influenza and aids government responses to outbreaks are assessed and the inability of governments to deal effectively with disease is a recurring theme the relationship between disease and war with the former often responsible for more deaths than the latter is also considered in detail as was the case during the last great influenza pandemic of 1918 19 at the end of the first world war

they came to earth pestilence war famine death four horsemen riding their screaming steeds racing to the corners of the world four horsemen with the power to destroy all of humanity they came to earth and they came to end us all when pestilence the first of the horsemen comes for sara burn s town one thing is certain everyone she knows and loves is marked for death unless of course the angelic looking horseman is stopped which is exactly what sara has in mind when she shoots the unholy beast off his steed too bad no one told her pestilence can t be killed alive and furious the horseman takes sara prisoner determined to make her suffer for impeding his mission despite her pleas nothing and no one gets in the way of his orders to destroy humankind only the longer pestilence spends beside sara s bravery and compassion the more he seems to understand her and understand humanity and the longer sara travels with pestilence and his plague the more uncertain she grows about his true feelings toward her and hers toward him sara might still be able to save the world but she ll have to sacrifice her heart in the process

this volume examines the undesirable or harmful cognitive emotional and behavioural side effects of covid 19 and of the behavioural restrictions imposed by governments on their populations during the pandemic societal lockdowns and other intervening behavioural restrictions built significantly around social isolation used by governments to control the spread of covid 19 disrupted the lives of most people there were economic costs for many as workplaces closed down as well as severe stresses on friendships and romantic relationships an increase in instances of abuse and domestic violence and concerns about people drinking too much alcohol or gambling too much as compensatory behaviours understanding which people were at risk and in what ways could teach important lessons for the future presenting a timely review of the most recent international research and evidence author barrie gunter assesses the major collateral psychological side effects of the pandemic looking forward gunter also considers how new models might be developed that take into account not just the need to halt the spread of a new virus but also minimise collateral damage which could be every bit as severe in both the short term and long term identifying and analysing the nature and severity of collateral side effects of pandemic related behaviour restrictions this is essential reading for students and researchers in psychology public health and medical sciences and policymakers assessing government strategies responses and performance

this is a new release of the original 1914 edition

physician girolamo mercuriale pronounced in on pestilence that plague was characterized by its lethal nature and the rapidity with which it spread his work appears here for the first time in english with an introduction that places the work within the context of the history of medicine and our own responses to epidemic disease
