the last unfinished work of piet mondrian 1872 194 the victory boogie woogie was acquired in 1998 by the dutch government and is on permanent loan at the gemeentemuseum den haag this work is considered one of the highlights of abstract 20th century art it had not been investigated properly before in 2006 a study was therefore initiated with two purposes namely research into the genesis of the work

while studying the current condition besides the painting itself historical sources and the restoration history were taken into account the purpose of this publication is to shed light on all aspects of this masterpiece thus contributing to a better understanding of this art work and a better understanding of the artist 00

together they present a broad range of styles and media from oil acrylic and mixed media paintings and drawings to photography sculpture installation art and video and digital imagery

this book argues that in the works of degas mondrian bacon schiele and warhol serial iteration articulates a process of free constructive becoming which they interpret in different ways not only does the serially iterative structure of the images show that activity and novelty are primary concerns but it involves the viewer in the activity presented in the images for these reasons serial iteration is fundamentally connected both to modernist aspects of the work and to other concerns such as the structure of subjectivity and the movement of history serially iterative structure opens up the meaning of these five artists images by relating them to concerns in contemporary art and thought

science and art are increasingly interconnected in the activities of the study and conservation of works of art science plays a key role in cultural heritage from developing new analytical techniques for studying the art to investigating new ways of preserving the materials for the future for example high resolution multispectral examination of paintings allows art historians to view underdrawings barely visible before while the use of non invasive and micro sampling analytical techniques allow scientists to identify pigments and binders that help art conservators in their work it also allows curators to understand more about how the artwork was originally painted through a series of case studies written by scientists together with art historians archaeologists and conservators science and art the painted surface demonstrates how the cooperation between science and humanities can lead to an increased understanding of the history of art and to better techniques in conservation the examples used in the book cover paintings from ancient history renaissance modern and contemporary art belonging to the artistic expressions of world regions from the far east to america and europe topics covered include the study of polychrome surfaces from pre columbian and medieval manuscripts the revelation of hidden images below the surface of van gogh paintings and

conservation of acrylic paints in contemporary art presented in an easily readable form for a large audience the book guides readers into new areas uncovered by the link between science and art the book features contributions from leading institutions across the globe including the metropolitan museum of art new york art institute of chicago getty conservation institute opificio delle pietre dure firenze national gallery of london tate britain warsaw academy of fine art and the national gallery of denmark as well as a chapter covering the thangka paintings by nobel prize winner richard ernst

major exhibition devoted to dutch painter piet mondrian s classic diamond compositions that helped define the de stijl movement in twentieth century dutch painting extensive documentation includes selected bibliography and chronology 110 pages with numerous black and white and color plates

dutch painter piet mondrian 1872 1944 was one of the pioneers of abstract art in the twentieth century his was a plastic art in which every curve spatial illusion every affect of the brush anything that recalled the techniques of impressionism was rejected his painting pursued relationship the necessarily two dimensional meeting of line and line in a ninety degree angle though he imbued this planar relationship with an asymmetric vitality mondrian s work shows a progression from naturalism in his early years to cubism which he encountered in paris in 1911 and finally this unique style of neoplastic painting containing no association with objective reality his work influenced many younger artists including fernand léger and willi baumeister this text discusses the progression of mondrian s career and his avant garde artistic beliefs as seen through his writings and his associations with other artists and intellectuals from publisher description

collects nine essays that discusses the creativity of influential artists as well as the legacy of their work following their deaths and covers wolfgang amadeus mozart piet mondrian frank gehry and others

this single volume reproduces all of mondrian s work the illustrations arranged in major chronological periods give a visual impression of the development of his art and also depict the range of media in which he worked drawings paintings prints and three dimensional works
