the material for these volumes has been selected from the past twenty years examination questions for graduate students at university of california at berkeley columbia university the university of chicago mit state university of new york at buffalo princeton university and university of wisconsin

originally published in 1986 this book consists of 100 problems in probability and statistics together with solutions and most importantly extensive notes on the solutions the level of sophistication of the problems is similar to that encountered in many introductory courses in probability and statistics at this level straightforward solutions to the problems are of limited value unless they contain informed discussion of the choice of technique used and possible alternatives the solutions in the book are therefore elaborated with extensive notes which add value to the solutions themselves the notes enable the reader to discover relationships between various statistical techniques and provide the confidence needed to tackle new problems

mathematical anxiety is a feeling of tension apprehension or fear which arises when a person is faced with mathematical content the negative consequences of mathematical anxiety are well documented students with high levels of mathematical anxiety might underperform in important test situations they tend to hold negative attitudes towards mathematics and they are likely to opt out of elective mathematics courses which also affects their career opportunities although at the university level many students do not continue to study mathematics social science students are confronted with the fact that their disciplines involve learning about statistics another potential source of anxiety for students who are uncomfortable with dealing with numerical content research on mathematical anxiety is a truly interdisciplinary field with contributions from educational developmental cognitive social and neuroscience researchers the current collection of papers demonstrates the diversity of the field offering both new empirical contributions and reviews of existing studies the contributors also outline
