presented at the Australian Institute of Project Management national conferences held in Australia in 2012, 2013 and 2014. Contributors here consist of both academics and practitioners with authors representing the latest developments in Australia, Indonesia and Saudi Arabia. The book brings together papers focused on the themes of project management, offices, stakeholders, complexity and risk management. It concludes with three case studies on the application of project management in specific contexts.

Designed for MBA students, this book offers a brief introduction to the basic concepts of operations management. It provides a strategic conceptual view of OM and the basics to complement class activities.

A continuation of the ongoing Oxford University's Centre for the Study of Values in Education and Business, the papers deal with the interactive effect of business and education as well as the moral and ethical concerns underpinning each.

The definitive guide to the theory of constraints in this authoritative volume, the world's top theory of constraints (TOC) experts reveal how to implement the ground-breaking management and improvement methodology developed by Dr. Eliyahu M. Goldratt. Theory of Constraints Handbook offers an in-depth examination of this revolutionary concept of bringing about global organization performance improvement by focusing on a few leverage points of the system. Clear explanations supplemented by examples and case studies define how the theory works, why it works, what issues are resolved and what benefits accrue and demonstrate how TOC can be applied to different industries and situations. Theory of Constraints Handbook covers critical chain project management for realizing major improvements in delivering projects on time to specification and within budget; drum buffer rope (DBR) buffer management and distribution for maximizing throughput and minimizing flow time; performance measures for applying throughput accounting to improve organizational performance; strategy marketing and sales techniques designed to increase sales closing rates and throughput; thinking processes for simple and complex environments; TOC methods to ensure that services actions support escalating demand for services while retaining financial viability; integrating the TOC thinking processes, the strategy and tactic tree; TOC measurements; the five focusing steps of TOC; and Six Sigma as a system of tools for sustainable improvement.
