the world of internet law is constantly changing and is difficult to follow even for those for whom doing so is a full time job this updated everything you need to know reference removes the uncertainty internet and the law technology society and compromises second edition is the go to source for anyone who needs clear explanations of complex legal concepts related to online practices and content this wide ranging alphabetical reference explores diverse areas of law including territorial jurisdiction and taxation that are relevant to or affected by advances in information technology and the rise of the internet particular emphasis is placed on intellectual property law and laws regarding freedom of expression the internet as this book shows raises questions not only about how to protect intellectual creations but about what should be protected entries also discuss how the has brought first amendment rights and free expression into question as society grapples with attempts to control leaks and to restrict content such as pornography spam defamation and criminal speech

this book explores the intrinsically multiscale issue of renewable energy transition from a local national and transnational perspective and provides insights into current developments in the upper rhine region that can serve as an international model organised around

the exploration of stakeholder issues the volume first describes a framework for public action and modelling and then articulates a triple complementary focus from the viewpoint of law economics and sociology this multidisciplinary approach is anchored in the social sciences but also explores the ways in which technological issues are increasingly debated in the implementation of the ecological transition with a focus on the upper rhine region of france germany and switzerland the contributions throughout analyse how concrete regional projects emerge and whether they are carried out by local authorities private energy groups network associations or committed citizens from this it appears that real world energy transition modes can be best understood as permanent transactional processes involving institutional regulations economic levers and barriers and social interactions this book will be of interest to advanced students and scholars focusing on renewable energy transition stakeholder issues environment and sustainability studies as well as those who are interested in the methodological aspects of the social sciences especially within the fields of sociology law economy geography political science urbanism and planning
