president clinton s health care reform proposals of 1993 represented the most far reaching program of social engineering attempted in the united states since the passage of medicare and medicaid in 1965 under the guise of reforming the health care system the clinton plan would have herded almost all americans under age sixty five into large government sponsored health insurance purchasing alliances that would have contracted with insurers to offer a standard set of benefits at regulated prices the plan came under fire from both republicans and democrats including moderates from both parties but it soon became apparent that what doomed it was a public unwilling to trust government to manage their health care the critical literature has failed to offer a cogent analysis of why government control of health care does not work american health care delivers that analysis this volume examines why untoward consequences usually follow when government sets out to do good things the contributors demonstrate how hospital rate regulation raises hospital prices that no fault medical malpractice increases the occurrence of faulty medicine and that fda regulation is a major cause for the escalating cost of new drugs part 1

the american health care system is in crisis skyrocketing costs and increasing bureaucracy have traumatized consumers and doctors alike gratzer brings a dose of common sense to this over regulated area of the american economy

meaningful healthcare reform requires understanding of our complex healthcare system this book was written to help clarify the difficult and poorly understood issues and problems of american healthcare its purpose is to help us move forward on the many difficult decisions that should be made to improve our healthcare system our unique combination of public private funding and free market capitalism system has been a major source of medical care advancements over the last half century the entrepreneurial spirit of risk takers who have invested billions of dollars to push forward innovative ideas and products has been key to its success we should not lose that driving force for medical advancements and our economy our american healthcare system needs reform we should fix it rationally with a scalpel not destroy it with a meat cleaver to optimize and appropriately guide that reform we should first understand and concentrate on the real problems primarily we should fix our healthcare system by decreasing its administrative complexity and inefficiencies the affordable care act should be modified significantly to make it more acceptable as part of our national effort for more meaningful reform rational solutions through political compromises are not easy to find in our highly polarized political environment it will be a long uphill climb but it is a challenge that we must meet for our uniquely american healthcare system to survive
