i came across an old photo recently and pondered the people in it the person in the centre was my late brother norman g donald of the raf the other figures in the photo i do not know

though i suspect they were his flight instructors at north battleford canada the photo bears my brother s script king pins all n battleford after qualifying as a pilot he sailed back to england and was posted to raf hunsdon just north of london in 1942 he was soon flying douglas havocs and bristol beaufighters night fighters were a new school of defence but it was hopeless finding enemy aircraft in the dark the turbinlite device was fitted to the beaufighters and havocs and the idea was to find the enemy somehow guided by ground control using heavy ground radar units too heavy to carry in aircraft turn on the turbinlite searchlight and illuminate the enemy aircraft a single engined hurricane fighter flying alongside then shot down the enemy aircraft it did help to see the target as this same sky was full of thousands of allied aircraft all trying to avoid each other

although economists have long recognised industrial districts as one of the key features of many economies it is only recently that attention has been focused on the region as an effective means of generating accurate insights into the larger picture of economic performance this renewed interest in regional issues has also placed at centre stage the role played by networks as a principal organisational feature of the local business community providing scholars with a rich topic for investigation and debate recent work has shown that universal generalisations concerning the impact of networking on the performance of industrial clusters lack credibility highlighting the consequent need to compare the role played by business networks in a variety of regions using a copious range of research material examining several british regions this volume poses a series of fundamental questions about the nature of industrial clusters and networks particular attention is paid to identifying the basic characteristics of a network outlining how they evolved in key industrial clusters and assessing their impact on industrial performance both regionally and nationally the durability of such networks is another key thread that runs through the essays prompting comparison with industrial clusters in britain and abroad these are issues which stimulate discussion on a wide range of factors within the disciplines of business economic and social history
