climate change lends itself to both political economy and humor vogel argues that mainstream economics fails to recognize the thermodynamic nature of climate change thereby missing the point of northern appropriation of the atmospheric sink the payment ecuador seeks for not drilling in the yasuní is equitable and efficient heeding the call of deirdre formerly donald mcloskey that economics needs humor vogel has written a scathing critique of economics as usual which also entertains

this book presents a new theory of market and capitalism detailing its key moments and general logic it is based on the distinction between two market types the simple commodity market and the capitalist one in contrast to what is usually uncritically accepted disequilibrium and imperfect competition are admitted here to be a functional norm of the capitalist market the book also shows that equilibrium and perfect competition are admitted to be a functional anomaly with crises considered as the result of such an anomaly it details the general principles and concrete measures of crisis proof policies and behavior

this book aims to propose a unique analytical framework to find out the general successful experience for large developing countries which are defined with two main physical characters of large population and vast land they are naturally crucial for the global development thirteen countries are chosen as large developing countries in this book which are china india russia brazil mexico indonesia south africa iran egypt pakistan nigeria ethiopia and congo drc on the basis of selecting massive data the author analyzes the performance of large countries in terms of human resources natural resources market size and other factors the book conducts the comparative study of large countries latecomer strength transformation path and innovation strategy with the perspective of development economics it presents a comprehensive overview about large developing countries

this book combines 1 the most extensive treatment of the causes and phenomena of climate change in combination with 2 an extensive treatment of social obstacles and challenges fossil fuel funded denialism media failure political failure and moral religious and economic challenges 3 the most extensive treatment of the needed

transition from fossil fuel energy to clean energy and 4 the most extensive treatment of mobilization it provides the most complete most up to date treatment of the various kinds of clean energy and how they could combine to provide 70 clean energy by 2035 and 100 before 2050 both u s and worldwide

the question that faces governments and militaries the world over is how best to allocate resources for management of defence in the new age this book by shri a k ghosh who has an economics background explores the framework for change in resource allocation and capability building it emphasises the importance of introducing programming in indian defence to serve as a link between defence planning and budgeting them is match between defence planning and budgeting needs to be connected by the introduction of resource constrained budgeting having a multi year perspective the rma force modernisation cost benefit analysis management of risks and internal and external audits are among the many issues the author has provided a perspective on it is argued by the author that defence needs to be viewed as a giant business and where possible business practices should be introduced the book is recommended reading forth planners and decision makers of defence management and will benefit readers from the armed forces as well the lay readers interested in the subject of national defence and security will also find it useful and interesting

economics has long been imprisoned by a one dimensional view of the person and the narrow assumption of self interest that this entails humanistic economics breaks out of this paradigm by proposing an alternative framework that is no longer incompatible with actions undertaken for the sake of deeply held values compelling reasons and higher interests the new theoretical foundation makes it possible to discuss in a new light questions of social institutions such as the relationship between government and the market as well as social policy goals like full employment industrial democracy and balanced international trade equipped with this basic insight the authors proceed to century old ideologies of individualist capitalism and scientific socialism

contains 168 alphabetically arranged essays that provide information about topics related to economics and includes biographical profiles of nearly one hundred noted

economists

gives you articles from various public press sources such as foreign policy the brookings review and the world i this work includes articles which examine specific microeconomic and macroeconomic issues income distribution and economic justice and the changing global economy it is supported by a student website
