the book reports on the development and validation of a computerized adaptive efl test which is used as an exit requirement for non english major undergraduates at a major chinese university unlike the tests reported in previous research on computerized adaptive language test calt which were mostly designed to assess vocabulary grammar and reading this test consists of listening and reading components using both dichotomously scored stand alone items and polytomously scored testlet based items the book is an essential and stimulating read for researchers and graduate students in the testing domain particularly for those who are interested in calt item response theory irt and quantitative research methods in general it also constitutes a solid reference resource for l2 teachers and test developers one of the distinctive features of the book is its operationalization of assessment use argument aua in the investigation of the construct validity of the calt another strength of this book is that it provides insight into the specific procedures that are followed in the development of calts and addresses a

few key issues such as local item dependence and dif detection that were ignored in previous calt development research

while the primary purpose of the book is a celebration of john s contributions to the field of measurement a second and related purpose is to provide a useful resource we believe that the combination of the developmental history and theory of the method the examples of its use in practice some possible future directions and software and data files will make this book a valuable resource for teachers and scholars of the rasch method this book is a tribute to professor john p keeves for the advocacy of the rasch model in australia happy 80th birthday john xii there are good introductory texts on item response theory objective measurement and the rasch model however for a beginning researcher keen on utilising the potentials of the rasch model theoretical discussions of test theory and associated indices do not meet their pragmatic needs furthermore many researchers in measurement still have little or no knowledge of the features of the rasch model and its use in a variety of situations and disciplines this book attempts to describe the underlying axioms of test theory and in particular the concepts of objective measurement and the rasch model and then link theory to practice we have been introduced to the various models of test theory during our graduate days it was time for us to share with those keen in the field of measurement in education psychology and the social sciences the theoretical and practical aspects of objective measurement
