the 2012 american elections were highly competitive with the unusually close partisan balance making the elections an opportunity for each of the two major parties this book assembles leading political scientists and political journalists to explain the 2012 election results and their implications for america s future in addition to assessing election results the book examines the consequences of the large ambitions of the obama presidency and the political and policy risks entailed in the pursuit of those ambitions it also explores congressional elections and policymaking since 2008 and how they affected election results in 2012 the book promises a more coherent focus than that evident in similar edited works achieved through a limited number of chapters and clear definition of chapter content

robotic animals are nowadays developed for various types of research such as bio inspired robotics biomimetics and animal behavior studies more specifically in the case of collective animal behavior research the robotic device can interact with animals by generating and exploiting signals relevant for social behavior once perceived by the animal society as conspecific these robots can become powerful tools to study the animal behaviors as they can at the same time monitor the changes in behavior and influence the collective choices of the animal society in this book we present novel robotized tools that can integrate shoals of fish in order to study their collective behaviors we used the current state of the art on the zebrafish social behavior to define the specifications of the robots and we performed stimuli analysis to improve their developments bio inspired controllers were designed based on data extracted from experiments with zebrafish for the robots to mimic the zebrafish locomotion underwater experiments involving mixed groups of fish and robots qualified the robotic system to be integrated among a zebrafish shoal and to be able to influence the collective decisions of the fish these results are very promising for the field of animal robot interaction studies as we showed the effect of the robots in long duration experiments and repetitively with the same order of response from the animals

the book focuses on four broad topics related to trapping of agriculturally important tephritid fruit flies namely i lures and traps ii invasion biology and detection of infestations iii

attract and kill systems and iv trade regulations and risk assessment this comprehensive structure progresses from the biological interaction between insect and lures traps to the area wide use of trapping systems to the utilization and impact of trapping data on international trade the chapters include accounts of earlier research but are not simply compendia and instead evaluate past and current work as a tool for critical analysis and proposal of productive avenues for future work at present there is no book available that deals with fruit fly trapping in such a broad context our book fills this gap and serves as a global reference for both those interested in fruit flies specifically as well as anyone dealing with the threat of invasive agricultural insects in general

in this volume leading experts from different disciplines and diverse geographic regions discuss fundamental often controversial topics in the field of tourism studies the debates include subjects such as the concept of the tourist the long term sustainability of tourism development the growth of volunteer tourism and the vulnerability of tourism

in this double blind peer reviewed volume expert contributors draw upon philosophers such as aristotle alasdair macintyre and emmanuel levinas in order to explore how the ethics of war and peace resonate with organizational ethics
