ruth linden s bold experimental book explores the interconnected processes of remembering storytelling and self fashioning juxtaposing autobiography and ethnography linden begins this study by situating herself in the context of her assimilated jewish family where the holocaust was shrouded in silences urged forward by these silences linden a feminist and sociologist began to interview jewish holocaust survivors in 1983 as linden interprets survivors accounts of the death camps and the resistance she reveals complex ways in which selves are constructed through storytelling the stories that unfold are continuously fashioned and refashioned never stripped of context or frozen in time what emerges is an unexpectedly elegant montage in which interviewee interviewer and author are intertwined linden s meetings with survivors and her encounters with their stories transformed her as a feminist a jew and a social scientist her analysis reveals the intimate connections between an ethnographer s lived experience and her interpretations of others linden s reflections on the process of ethnography belie the rhetoric of positivism in the social sciences they will inspire other scholars to break free of research and writing practices in their own disciplines that efface the ineluctable bond between knower and known all readers will be challenged to reexamine the holocaust in an intensely personal light and to reconsider the meanings of survival in our own time cutting across the boundaries of ethnography and autobiography to create a new kind of

text making stories making selves offers a significant contribution to interpretive social science and the literature of the holocaust linden s original and courageous work is vital reading for holocaust scholars students of modern jewish life sociologists feminist theorists and all readers seeking to understand their own relationship to the holocaust

the topic of memory has moved to prominence in recent years this is partly due to a spate of anniversaries and commemorations of events such as the holocaust and the second world war whose significance for the present is affirmed even as their meanings continue to be debated
