textual information in the form of digital documents quickly accumulates to create huge amounts of data the majority of these documents are unstructured it is unrestricted text and has not been organized into traditional databases processing documents is therefore a perfunctory task mostly due to a lack of standards it has thus become extremely difficult to implement automatic text analysis tasks automatic text summarization ats by condensing the text while maintaining relevant information can help to process this ever increasing difficult to handle mass of information this book examines the motivations and different algorithms for ats the author presents the recent state of the art before describing the main problems of ats as well as the difficulties and solutions provided by the community the book provides recent advances in ats as well as current applications and trends the approaches are statistical linguistic and symbolic several examples are also included in order to clarify the theoretical concepts

more mathematical concepts are addressed at younger ages as a result of common core state standards in the 6th grade students do much more in depth work with geometry ratio and percentage as well as statistics and probability this is not the first time these concepts are addressed though the common core approach requires going deeper into content learned in earlier years because of this need to look at each grade instead of just one year a reference guide for parents and guardians would provide a much better snapshot showing the big picture mathematical goal for each student

6th grade math is oftentimes seen as an impossible task with its ratios fractions equations and statistical thinking the challenge therefore for the teacher is to completely reverse such mindset by making the task actually entertaining this guide holds valuable information on activities and concepts that make learning 6th grade math a walk in the park be sure to secure your copy today

this book features high quality research papers presented at the 4th international conference on advanced computing and intelligent engineering icacie 2019 department of computer science rama devi women s university bhubaneswar odisha india it includes sections describing technical advances and contemporary research in the fields of advanced computing and intelligent engineering which are based on the presented articles intended for postgraduate students and researchers working in the discipline of computer science and engineering the book also appeals to researchers in the domain of electronics as it covers hardware technologies and future communication technologies
