in this book john p burkett presents microeconomics as an evolving science interacting
with mathematics psychology and other disciplines and offering solutions to a growing
range of practical problems the book shows how early contributors such as xenophon

ibn khaldun and david hume posed the normative and positive questions central to microeconomics it expounds constrained optimization techniques as developed by economists and mathematicians from daniel bernoulli to leonid kantorovich emphasizing their value in deriving norms of rational behavior and testable hypotheses about typical behavior applying these techniques the book introduces partial equilibrium analysis of particular markets and general equilibrium analysis of market economies the book both explains how laboratory and field experiments are used in testing economic hypotheses and provides materials for classroom experiments it gives extensive and innovative coverage of recent findings in cognitive psychology and behavioral economics which not only document behavior inconsistent with some traditional theories but also advance positive theories with superior predictive power

advances in experimental social psychology

this authoritative handbook is the reference of choice for researchers and students of personality leading authorities describe the most important theoretical approaches in personality and review the state of the science in five broad content areas biological bases development self and social processes cognitive and motivational processes and emotion adjustment and health within each area chapters present innovative ideas findings research designs and measurement approaches areas of integration and consensus are discussed as are key questions and controversies still facing the field

the psychodynamics and psychology of gambling is the first volume in the four volume the gambling theory and research series author mikal aasved felt a need to fill what he perceived to be a lack of background sources or reviews of literature pertaining to gambling theory and research this series will present major findings of leading researchers as they study the causes and effects of gambling both recreational and excessive this first entry in the series reviews the most influential psychodynamic and psychological theories that explain why people gamble psychoanalytical theorists discussed include freud von hattingberg fenichel bergler simmel greenson stekel and others aasved includes sections on behavioral learning or reinforcement theory psychological approaches to gambling with discussion of skinner s ideas and research findings as well as pavlov s principles this book begins with the question why do people gamble and offers many theories proposed by clinicians laboratory and field

researchers and participants as they seek to explain the motivation behind gambling the differences between gambling as entertainment and gambling compulsion is a focus of much research as well addresses ideas set forth as to why some people are able to control their gambling and others cannot even when it means sacrificing their jobs family and material possessions this text provides a comprehensive background into theories of addiction research as studied by leaders in the field

decision making is an executives guide for discovering and creating reality based decision making from a historical perspective of decision making through the organization of the decision making process

this fascinating and extensive study enlivened by interviews with british and american gamblers will be enthralling reading not just for those interested in the cultural and social implications of gambling researchers in sociology cultural studies and the history of ideas but for anyone interested in how we create meaning in an increasingly insecure world

a new economics for the new economy how science and economics are being brought together
