all hell breaking loose is an eye opening examination of climate change from the perspective of the u s military the pentagon unsentimental and politically conservative might not seem likely to be worried about climate change still linked for many people with polar bears and coral reefs yet of all the major institutions in american society none take climate change as seriously as the u s military both as participants in climate triggered conflicts abroad and as first responders to hurricanes and other disasters on american soil the armed

services are already confronting the impacts of global warming the military now regards climate change as one of the top threats to american national security and is busy developing strategies to cope with it drawing on previously obscure reports and government documents renowned security expert michael klare shows that the u s military sees the climate threat as imperiling the country on several fronts at once droughts and food shortages are stoking conflicts in ethnically divided nations with climate refugees producing worldwide havoc pandemics and other humanitarian disasters will increasingly require extensive military involvement the melting arctic is creating new seaways to defend and rising seas threaten american cities and military bases themselves while others still debate the causes of global warming the pentagon is intensely focused on its effects its response makes it clear that where it counts the immense impact of climate change is not in doubt

exploring how the u s military can move beyond iraq and afghanistan since the september 11 2001 attacks the u s military has been fighting incessantly in conflicts around the globe often with inconclusive results the legacies of these conflicts have serious implications for how the united states will wage war in the future yet there is a stunning lack of introspection about these conflicts never in modern u s history has the military been at war for so long and never in u s history have such long wars demanded so much of so few the legacy of wars without end include a military that feels the painful effects of war but often feels alone the public is less connected to the military now than at any point in

modern u s history the national security apparatus seeks to pivot away from these engagements and to move on to the next threats notably those emanating from china and russia many young americans question whether it even makes sense to invest in the military at best there are ad hoc unstructured debates about iraq or afghanistan simply put there has been no serious organized stock taking by the public politicians opinion leaders or the military itself of this inheritance despite being at war for the longest continuous period in its history the military is woefully unprepared for future wars but the united states cannot simply hit the reset button this book explores this inheritance by examining how nearly two decades of war have influenced civil military relations how the military goes to war how the military wages war who leads the military and who serves in it how the military thinks about war and above all the enduring impact of these wars on those who waged them if the u s military seeks to win in the future it must acknowledge and reconcile with the inheritance of its long and inconclusive wars this book seeks to help them do so

the nature of recent challenges and the types of missions the u s department of defense dod has undertaken highlight the need for dod to consider ways to help the military prepare to work with other government agencies international organizations private and nongovernmental organizations and foreign militaries these challenges require dod to combine military and nonmilitary means such as intelligence diplomacy and developmental assistance to advance u s national security interests moreover exhibiting cultural awareness and sensitivity vis a vis non dod partners is paramount to successful operational planning and execution to build or bolster local governance to foster economic growth and to respond to natural disasters the united states must also use different types of tools military and otherwise simultaneously it is no small task to synchronize these different tools so that they work in tandem or at least minimize conflict between them this report provides suggestions for how the u s military can help prepare its personnel to work successfully with interagency multinational and coalition partners the authors found that almost all of the requirements for integrated operations training can be found in existing joint and service task lists current training programs aimed at headquarters staffs need to be revamped to focus on high priority tasks that are amenable to training

shah argues that the concept of self defense in islamic and international law is compatible al qaeda s declaration of jihad does not meet the islamic legal test similarly the invasion of iraq does not meet the international legal test dr shah examines those causes attributed to islam and non islamic causes of terrorism and argues that the theory of reactive terror provides the most plausible explanation for so called islamic terrorism the nature of conflicts in afghanistan and iraq is changing and muslim leaders not including al qaeda or pro anglo american governments may by consensus declare jihad if the occupying forces do not withdraw such declaration would be according to islamic and international law
