the urban projects manual addresses key issues facing professionals working in the urban sector and illustrates methods with examples for this new edition sections have been updated references added to latin american cases and additional technical notes included is likely to continue to be an indispensable aid to development professionals worldwide habitat international

this thesis traces the development of urban operations from world war ii to the present to examine the evolution of doctrine training organization and equipment four specific operations battles are examined including stalingrad in world war ii on the eastern front belfast in northern ireland from 1968 to the present beirut in lebanon in 1982 and an illustrative future model in seoul in korea in 2012 the historical examples are compared to the u s scenario in seoul korea in 2012 to determine similarities and differences future lessons learned are extrapolated from these similarities and differences the study concludes that the u s army has weaknesses in doctrine training organization and equipment in war and military operations other than war at the tactical and operational levels this study recommends an updated integrated doctrine a training facility and training plans at the unit level a more flexible organization and procurement of new equipment

describes freeway conditions which are subject to improvement by means of electronic surveillance and control ramp metering is presented along with a benefit cost analysis of its effectiveness

this report documents the activities and results of a test of non intrusive traffic detection technologies seventeen devices representing eight different technologies were evaluated in varying environmental and traffic conditions the following technologies were tested passive infrared active infrared magnetic radar doppler microwave pulse ultrasonic passive acoustic and video testing was done at both freeway and intersection locations emphasis was placed on urban traffic conditions and locations that typify temporary counting locations the evaluation also focused on the ease of system setup and use general system reliability and system flexibility

the provision of affordable water supply and sanitation services to all population groups rich and poor in urban areas requires the use of a variety of technologies supported by information and education activities experience has shown that beneficiaries in particular those living in areas with few or none of the customary municipal services need to understand the purpose the cost and the operation of the proposed improvement if they are to enjoy the intended health and economic

benefits as a consequence the user community must participate in the project preparation and technology selection process and the designer must know and fully understand existing conditions and user attitudes the planning of the sanitation component of the jakarta sewerage and sanitation project required such user participation and background information project authorities therefore developed a process of data collection community consultation and statistical analysis which led to recommendations for user affordable and acceptable sanitation improvements this process including design of questionnaires investigator training and computer analysis of data is described in this document in a form that will permit other project planners to utilize the process
