despite the fact that the name of many characters mentioned in the old testament like david king of israel have been recently confirmed by archaeology as well as their epoch and the events in which they were involved most archaeologists continue to deny the historicity of the bible they view as pious fiction or a mythical account they argue that the major events in the bible such as the victory of abraham against chedorlaomer an unknown king of elam around 2000 bce the victory of moses against an unknown pharaoh around 1500 bce or the victory of esther an unknown persian queen against an unknown vizier of xerxes never existed because they left absolutely no evidence they also explain that according to what we know today these events could not have occurred these logical arguments are impressive but a precise chronological analysis based on absolute dates coupled with a rigorous historical investigation shows that all those major events really took place at the dates and places indicated

history has tended to measure war's winners and losers in terms of its major engagements battles in which the result was so clear cut that they could be considered decisive Cannae Königsgberg Austerlitz Midway Agincourt all resonate in the literature of war and in our imaginations as tide turning but these legendary battles may or may not have determined the final outcome of the wars in which they were fought nor has the genius of the so called great captains from Alexander the Great to Frederick the Great and Napoleon play a major role wars are decided in other ways Cathal J. Nolan's *The Allure of Battle* systematically and engrossingly examines the great battles tracing what he calls short war thinking the hope that victory might be swift and wars brief as he proves persuasively however such has almost never been the case even the major engagements have mainly contributed to victory or defeat by accelerating the erosion of the other side's defences massive conflicts the so called people's wars beginning with Napoleon and continuing until 1945 have consisted of and been determined by prolonged stalemate and attrition industrial wars in which the determining factor has been not military but matériel Nolan's masterful book places battles squarely and mercilessly within the context of the wider conflict in which they took place in the process it help corrects a distorted view of battle's role in war replacing popular images of the battles of annihilation with somber appreciation of the

commitments and human sacrifices made throughout centuries of war particularly among the great powers accessible provocative exhaustive and illuminating the allure of battle will spark fresh debate about the history and conduct of warfare
