what is the self does it exist if it does exist what is it like it s not clear that we even  
know what we re asking about when we ask these large metaphysical questions  
the idea of the self comes very naturally to us and it seems rather important but it  
s also extremely puzzling as for the word self it s been taken in so many different  
ways that it seems that you can mean more or less what you like by it and come  
up with almost any answer galen strawson proposes to approach the seeming  
problem of the self by starting from the thing that makes it seem there is a  
problem in the first place our experience of the self our experience of having or  
being a self a hidden inner mental presence or locus of consciousness he argues  
that we should consider the phenomenology experience of the self before we  
attempt its metaphysics its existence and nature and when we have considered

what it s like for human beings assuming we can generalize about ourselves we need to consider what it might be like for other possible creatures what s the very least that might count as experience of oneself as a self this he proposes will give us a good idea of what we ought to be looking for when we go on to ask whether there is such a thing an idea worth following wherever it leads it leads strawson to conclude that selves inner subjects of experience do indeed exist but they bear little resemblance to traditional conceptions of the self
