mechanics garages supply of spare parts and gasoline distribution as well as traffic regulations had to be created ex nihilo all these processes are detailed in the book like cars bicycles and motorcycles also were increasingly used as of the 1920s thus increasing choice in people s mobility more road traffic also implied that travelers needed places to spend the night and eat the change from caravanserais to guest houses and hotels is discussed in part 3 these changes in transportation methods did not come alone for other modern tools of change such as the sewing machine and the typewriter also made their appearance and had a major impact on people s availability and use of time finally the piano made its entry onto the iranian musical scene and although not perfectly in tune with the traditional iranian musical system it is now as much part of music making in iran as the tar and santur part 4 of the book all these changes and new technologies did not happen overnight or without problems and slow adoption initially was limited to the upper class however with falling prices and changing needs and policies these new technologies eventually reached a larger public and the idea that they once were exotic and out of reach is now inconceivable to iranians the studies in this book provide a new vantage point and understanding of the transfer of modern technology for scholars of the social economic and cultural history of the middle east
