this textbook provides readers with a blend of practical and theoretical information using real world examples and illustrations to help users grasp abstract ideas and apply them to their research

bomm is a system of programs which causes an electronic computer to perform arithmetic operations on time series in devising the system the main objectives were 1 to enable a wide variety of data formats to be accepted without recoding 2 to allow gross errors to be removed automatically from the data 3 to provide a considerable variety of arithmetic operations and leave the user free to choose the order in which they are applied and 4 to allow further processes to be incorporated into the system the present user s guide provides the information needed by the user in operating the system more complete details including flow diagrams of the programs are given in a longer work entitled manual of the bomm system of programs for the reduction of time series

lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the nasa scientific and technical information database

the purpose of this book specifically is to teach surgeons academic or community surgical fellows and surgical residents regardless of the surgical specialty the skills to appraise what they read in the surgical literature surgeons need to be able to understand what they read before applying the conclusions of a surgical article to their practice as most surgeons do not have the extra training in health research methodology understanding how the research was done how to interpret the results and finally deciding to apply them to the patient level is indeed a difficult task chapters explain the methodological issues pertaining to the various study designs reported in the surgical literature most chapters begin with a clinical scenario with uncertain course of action with which most surgeons are struggling readers are taught how to search the literature for the best evidence that will answer the surgical problem under discussion an identified article that seems relevant to the problem you are investigating can be appraised by addressing 3 key questions 1 is the study i am reading valid 2 what are the results of this study 3 can i apply these results to my patients while the primary goal of evidence based surgery is to teach surgeons how to appraise the surgical literature an added benefit is that the concepts explained here may help research minded surgeons produce higher quality research
