provides information about effective treatment protocols and supplements to battle lyme disease

fifty nine year old robert laplante gave up cigarettes in his twenties was never overweight practiced good health habits and had run marathons and many other foot races he lived his life in a way he believed would ward off terrible things like cancer but in november 2008

laplante received the devastating diagnosis of signet ring cell adenocarcinoma a rare and aggressive form of cancer that begins in the appendix in cancer no chemo laplante documents his three year battle with cancer from the initial diagnosis to surgery to remove ten inches of colon and twenty two lymph nodes to winning the fight through journal entries he shares his innermost thoughts during his treatment and recovery including the fearful decision to forgo chemotherapy in favor of holistic healing methods that are gaining a place in the battle against cancer in this memoir he shares how he believes a positive attitude is the most important tool that inspires positive action cancer no chemo provides an inspiring look at how one man battled a foreboding cancer diagnosis and won

the electroherbalism frequency lists third edition contains frequencies that people use for electrotherapy instruments such as emems rife machines rife bare devices function generator pad devices hulda clark function generators tesla therapy devices and other alternative bioelectronic instruments this compilation includes the consolidated annotated frequency list and the non consolidated frequency list also known as the cafl and ncfl and the newly revised cafl cross reference list cafl xref as well as the chapters introduction to alternative bioelectronic therapy devices electrical and frequency effects on pathogens and james bare s understanding our frequencies through harmonic associations the electroherbalism frequency lists are some of the most used references for frequency researchers the world over

microbes were the first forms of life on this planet and have survived by adapting to ever changing environments from simple one celled life forms to intelligent decision making life sustaining species in charge of many primary functions in earths biochemical and biological balances the scientific community estimates that life began approximately 3 5 billion years ago as a result of a complex sequence of chemical reactions that took place in earths atmosphere there was virtually no oxygen and these first microorganisms were surviving by eating naturally occurring foods gradual changes to these earliest cells resulted in new life forms that were no longer dependent on the same food supply as their ancestors they were able to feed themselves by using the energy of the sun without the activity of these early organisms earths atmosphere would still be without oxygen and the evolution of oxygen dependent animals including humans would have never occurred microorganisms are found in every environment from the deepest sea to the highest mountains and from the deserts to the poles microbes are in the air we breathe the water we drink and the food we eat they are

also found in the soil plants animals and the human body the number of bacteria living within the human body of the average human adult is estimated to outnumber human cells ten to one and is found mostly on our skin the respiratory tract the digestive system and the oral cavity microbes control every aspect of our lives exposure to bacteria and or viruses and our interaction with these invaders will largely depend on the health of our internal environment and our mental emotional state in order to understand how changes in bacterial populations affect us we must consider lifestyle nutrition personal hygiene exposure to stress pollution and the environment many single organisms exhibit intelligence of a kind not seen in other species of the animal or plant kingdom they neither have nervous systems nor brains but harbor an internal system that can be equated to a biological computer to solve newly encountered problems they assess the situation recall stored data of past experiences and then execute information processing transforming the colony into a super brain bacteria do not just react to change in their surroundings they anticipate and prepare for it they are not simple solitary organisms they are highly social and evolved creatures they congregate to fend off enemies meet challenges of nature to reproduce obtain food and maintain their critical environment some bacterial intelligence if compared to human levels is 60 points higher than the human average of an iq of 100 microbes can keep us healthy and fend off invaders or make us very ill and may kill us under the right circumstances we must provide a healthy environment for our resident bacteria to flourish and to help us maintain physical mental and emotional health regenerating our individual bioterrain means forming alliances not antagonisms with the microbial community
