this book takes into account the psycho social factors of individual groups and community group process and dynamics while studying the subject it also deals with the principles and methods of health education of which communication and community participation are essential components in the process it teaches every individual how to maintain positive health and when how and where to seek remedial action when afflicted with illness

a new approach to research ethics is a clear practical and useful guide to the ethical issues faced by researchers today examining the theories of ethical decision making and applying these theories to a range of situations within a research career and process this text offers a broader perspective on how ethics can be a positive force in strengthening the research community drawing upon a strong selection of

challenging case studies this text offers a new approach to engage with ethical issues and provides the reader with a broader view on research ethics in practice capturing both different stages of research careers and multiple tasks within that career including supervision and research assessments thoughts on questions such as increasing globalisation open science and intensified competition an increased understanding of undertaking research in a world of new technologies an extension of research ethics to a multidisciplinary and interdisciplinary approach an introduction to a guided dialogue method which helps to identify and engage with ethical issues individually and as a research community a new approach to research ethics allows for self reflection and provides guidance for professional development in an increasingly competitive area full of valuable guidance for the researcher and ethical decision maker this is an essential text for postgraduate students senior academics and developers of training courses on ethics for researchers

through a wealth of examples diagrams and real world case studies this groundbreaking book provides a streamlined realistic methodology to change business continuity dramatically and shows you how you can execute it in your own organization

the heart of the contemporary argument on climate change and energy transition focuses on how energy supply should be decarbonized to mitigate greenhouse gas emissions this book proposes an alternative approach the age of fire is over a new approach to the energy transition finds that energy transitions are not driven by supply side driven transformations but rather by evolutions in demand patterns exploring the potential of recently emerged key technologies the age of fire is over argues that the so called energy transition has not yet started in the future key technologies will significantly transform demand and provide services at a fraction of today s cost or offer new services not yet imagined to a large extent energy paradigm shifts are driven by such evolutions largely inevitable and often unanticipated because they provide societies with greater benefits lower costs more jobs and rapid adaptation this book closes with key novel recommendations for government institutions to accelerate the energy transition which instead of replicating an approach from the past should focus on these demand transformations to both advance civilization and mitigate climate change with foreword by jean pascal tricoire schneider electric chief executive officer

international journal of contemporary visual artists

now thoroughly revised and updated the book discusses recent breakthroughs in media technology including such exciting advances as video discs and cassettes two way television satellites cable and much more
