mercury gives informed perspectives on salient issues in research education history and public policy relating to astronomy

astronomy with a budget telescope 2nd edition is a complete introduction to buying and using a low cost amateur astronomical telescope it provides essential hints and tips about what to look for when buying on a budget the best are now excellent value but they all lack an astronomer s advice about setting them up and using them astronomy with a budget telescope was first published in 2003 since then technology has moved on substantially the main factors are first the availability of fairly inexpensive computer

controlled go to telescopes which after setting up can automatically locate any celestial objects with reasonable accuracy second digital cameras have now almost completely displaced wet film cameras and some of them are particularly well suited to astronomical use third prices are down and quality is up this new edition is revised and extended to include using a low cost go to telescope there are various pitfalls to be avoided and how this class of instrument can make amateur astronomy more accessible to those with limited time at their disposal it also discusses the new breed of mid range digital cameras that include powerful on board processing and image enhancement software that used to be available only to people with advanced astronomical ccd cameras finally there are detailed reviews and test reports on some of the budget telescopes that are available on main street and by mail order
