excerpt from how to choose and use a lens practical photography no 3 in the majority of cases the selection of one s first lens means the purchase of a camera complete and ready for use but this scarcely limits the scope for choice for every grade of lens may be had today on the moderate priced cameras of all makers and only in the cheapest styles is there no choice of lens equipment we will begin with a consideration of the simplest forms of lenses but we must first consider the elementary principles of optics light and its transmission to the physicist light presents itself as vibrations of the luminiferous ether a perfectly elastic medium which is supposed to fill space and the principles of optics are deduced from a mathematical consideration of the changes of direction and velocity of these waves or vibrations when passing from one medium to another a much simpler conception is to assume that every luminous point emits rays of light which travel in absolutely straight lines in every possible direction as long as they remain in the same medium in passing from a rarer medium such as air to a denser one such as glass the speed of the rays is lessened and from this fact follows the possibility of a lens as will appear later about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections

present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
