proceedings of the 3rd international seminar held in lyon may 25 27 1983

the kyrenia ship a greek merchantman built around 315 bc which sank off the north coast of cyprus was excavated between 1968 and 1972 under the direction of michael i katzev of the university of pennsylvania and oberlin college the importance of this ship lies in the exceptionally well preserved hull that provided new insights into ancient shipbuilding as well as the cargo it carried the hold was stacked with transport amphoras of various types made on rhodes with a few examples from samos kos knidos and cyprus supplemented by a consignment of millstones iron billets and almonds the cabin pottery from rhodes also suggests this was the vessel's home port a conclusion supported by most of the scientific ceramic analyses its trade route included rhodes cyprus and the levant with perhaps egypt as a final destination this volume provides a detailed history of the excavation followed by definitive studies of the amphora cargo and the pottery associated with shipboard life some of the amphora stamps suggest that the ship sank between 294 and 291 bc

dates corroborated by the cabin wares the repetition of four drinking cups kantharoi oil containers gutti wine measures olpai as well as bowls and saucers suggests that the ship was sailed by a crew of four seven bronze coins were recovered five minted in the name of alexander the great and one well known type of ptolemy i produced only on cyprus

based on his successful a practical guide to linux sobell is known for his clear concise and highly organized writing style this new book combines the strengths of a tutorial and those of a reference to give readers the knowledge and skills to master red hat linux

the book focuses on the archaeology of the late geometric and early archaic north eastern aegean through the emergence manufacture distribution and consumption of a regional pottery group known as g 2 3 ware it offers the first comprehensive in depth study through combination of scientific fabric analysis and traditional morphological stylistic comparative and distribution analysis methods the large body of studied material allows for drawing conclusions on a broader geographical and historical scale in contrast to earlier studies focused on individual sites the manufacture distribution and consumption patterns are characterised by diversity which reflects a dynamic multiethnic communication network developed in the northern aegean basin in the late 8th and the 7th c bc the adoption of g 2 3 ware by local thracian coastal communities is discussed in the light of transfer of knowledge and social practices it is argued that the g 2 3 ware potters were aware of earlier and contemporaneous ceramic developments in southern greece and anatolia and created a blend of pottery features specific for each one of these areas the study deconstructs the forged link between g 2 3 ware and the greek colonisation in the area by linking it to a local pre colonial development
