a history of the postal system that once connected the ottoman empire before the advent of
steamships or the telegraph the premier technology for long distance communication was the
horse run relay system every empire had one including the ottoman empire in the sublime post
choon hwee koh examines how the vast ottoman postal system worked across three centuries by
tracking the roles of eight small scale actors the courier the tatar imperial decrees the bookkeeper
the postmaster the villager money and the horse there are stories of price gouging postmasters of
murdered couriers and their bereaved widows of moonlighting officials transporting merchandise
of neighboring villages engaged in long running feuds of bookkeepers calculating the annual costs
of horseshoes halters and hay of tatar couriers and british travelers sharing drunken nights at post
stations of swimming with horses across rivers and of hiding from marauding bandits in the desert
by weaving together chronicles sharia court records fiscal registers collective petitions
appointment contracts and imperial decrees from the ottoman archive this study of a large scale

communications infrastructure reveals the interdependence of an empire and its diverse imperial subjects koh traces this evolving interdependence between 1500 and 1840 to tell the history of the ottoman empire and its changing social order

this book introduces readers to innovative bio inspired computing techniques for image processing applications it demonstrates how a significant drawback of image processing not providing the simultaneous benefits of high accuracy and less complexity can be overcome proposing bio inspired methodologies to help do so besides computing techniques the book also sheds light on the various application areas related to image processing and weighs the pros and cons of specific methodologies even though several such methodologies are available most of them do not provide the simultaneous benefits of high accuracy and less complexity which explains their low usage in connection with practical imaging applications such as the medical scenario lastly the book illustrates the methodologies in detail making it suitable for newcomers to the field and advanced researchers alike

new york times best selling author and secret space program researcher mike bara brings us this lavishly illustrated volume on alien structures on mars was there once a vast technologically advanced civilization on mars and did it leave evidence of its existence behind for humans to find eons later did these advanced extraterrestrials vanish in a solar system wide cataclysm of their own making only to make their way to earth and start anew was mars once as lush and green as the earth and teeming with life did mars once orbit a missing member of the solar system a super earth that vanished in a disaster that devastated life on earth and venus and left us only the asteroid belt as evidence of its once grand existence did the survivors of this catastrophe leave monuments and temples behind arranged in a mathematical precision designed to teach us the secret of a new physics that could lift us back to the stars does the planet have an automated defense shield that swallows up robotic probes if they wander into the wrong areas and are the lights still on down there deep below the sands of mars just waiting for us to uncover them mike bara examines all these questions and more in this astounding book full of fascinating information on the following topics mars as the abode of life what happened to mars the true colors of mars the message of cydonia the politics of mars the pathfinder sphinx mars global surveyor discoveries face it it's a face tons more

in this volume the structure and reactions of radioactive nuclei are described the relevance of halo nuclei to nuclear astrophysics is stressed in different contributions other topics included are three body aspects of light neutron rich nuclei elastic scattering charge exchange and coulomb excitation fragment moment distribution mass at half life measurement and electromagnetism induced fission

the book deals with developing the concept of professional vision noticing and knowledge based reasoning among future primary and secondary school teachers of biology mathematics english as a foreign language art and social studies researching the use of video interventions during teacher training programmes the authors show that short term interventions do not significantly improve professional vision which is in contrast to student teachers perception of the practice the book also uses case studies to uncover individual differences in student teachers learning taking

into account their various backgrounds and approaches this is a valuable resource for teacher educators who are considering the incorporation of video intervention courses into study programmes and for researchers interested in the development of professional vision
